

## Entryphone 94LH rear-illumination lamp-holder

The Entryphone 94LH lamp-holder fits into any 9200 multi-button door panel to provide rear illumination of the name inserts. It is designed as a push-fit insert so that it can be placed behind any particular name holder.

To ensure even illumination small white plastic diffusers are provided. One should be placed underneath the lamp-holder itself to reduce the intensity of light and the other in the recess closest to the lamp to prevent a shadow cast.
