The Entryphone® 92Q/1 brings our classic single button units up to date with full compatibility with our Q series equipment.

The Entryphone Q series features a two-wire common bus connections throughout the system whilst adding enhanced security and convenience features for our video door entry systems. The integrated wide-angle camera offers excellent caller visibility even in very low-light conditions.

For those who wish to answer their door via smart phone, the 92Q/1 works with the Q series video telephones with WiFi capability, allowing calls to be forwarded using the Entryphone QV Connect app on iOS or Android devices.

These units are available in three standard finishes for either surface or flush mounting.
